Money wheel rules

The player bets on any number that they want and the wheel is spun. The Wheel will stop and the indicator will show the “winning number”, with all other numbers losing.

For example if the Wheel stopped on “5”, anyone betting on the 5 would be paid “5 times their original bet”; i.e., with one chip bet, the winner gets paid back 6 chips, that is their own chip plus 5 more, for total of 6.

If 20 was the number bet on and it is the winning number, and the bettor had one chip bet, they would get back 21 chips.

If the “Flag” or the “Joker” are bet and the winning number, anyone betting on them would be paid back 35 to 1 on their bet.
