## Instructions

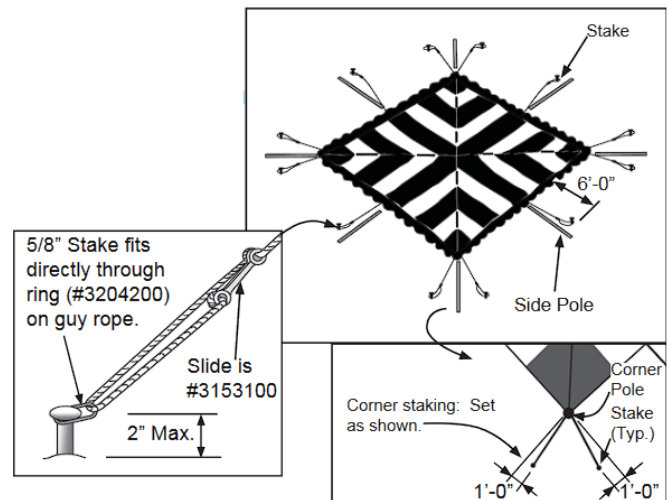

# PARTY CANOPY

## Operating Instructions

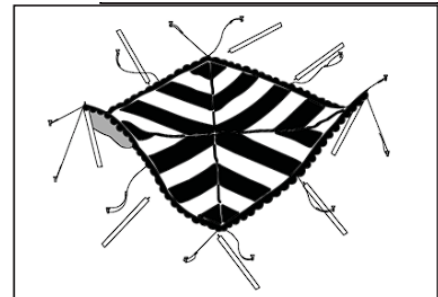

- In the area where the canopy will be setup, remove the rolled up canopy from the largest bag, unroll and unfold. The top of the canopy can be identified by its smoother surface.

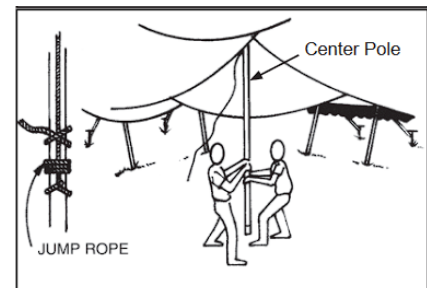

- Assemble side poles and lay straight out from each pole hole in canopy. Drive a stake 6 feet out from each pole hole. The stake must be driven through the ring attached to each guy rope as shown.

- Raise the side poles by starting at opposite corners and inserting the poles into the gold pole holes. At each corner pole, put a wood block (included in bag) under the pole to prevent the pole from sinking in the ground. Adjust the guy rope at each pole so that the poles stand straight up.

- Raise the center pole into the center pole hole of the canopy and tie the jump rope round the center pole as seen in the image. Put a wood block under the center pole to prevent it from sinking into the ground. Tighten all guy lines at each side pole.

- To take down the canopy, do the steps in reverse.
